

CERTIFICATE OF ACCREDITATION

ANSI National Accreditation Board

11617 Coldwater Road, Fort Wayne, IN 46845 USA

This is to certify that

Koenig Scale Company, Inc.

4779 East Margaret Drive

Terre Haute, IN 47803

has been assessed by ANAB and meets the requirements of international standard

ISO/IEC 17025:2017

while demonstrating technical competence in the field of

CALIBRATION

Refer to the accompanying Scope of Accreditation for information regarding the types of activities to which this accreditation applies

L1126-1

Certificate Number

ANAB Approval

Certificate Valid Through: 12/28/2020
Version No. 003 Issued: 11/26/2019

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017. This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (refer to joint ISO-ILAC-IAF Communiqué dated April 2017).

SCOPE OF ACCREDITATION TO ISO/IEC 17025:2017

Koenig Scale Company, Inc.

4779 East Margaret Drive
Terre Haute, IN 47803
Kurt Koenig
812-877-6121

CALIBRATION

Valid to: December 28, 2020

Certificate Number: L1126-1

Mass and Mass Related

Table with 4 columns: Parameter/Equipment, Range, Expanded Uncertainty of Measurement (+/-), Reference Standard, Method, and/or Equipment. Rows include Class I and High Precision Lab Balances, Class II Lab Balances and High Precision Scales, Class III & Equivalent Industrial Scales, Class IIIL Vehicle and Hopper Scales, and Unmarked and High-Resolution Scales.

Calibration and Measurement Capability (CMC) is expressed in terms of the measurement parameter, measurement range, expanded uncertainty of measurement and reference standard, method, and/or equipment. The expanded uncertainty of measurement is expressed as the standard uncertainty of the measurement multiplied by a coverage factor of 2 (k=2), corresponding to a confidence level of approximately 95%.

- Notes:
1. On-site calibration service is available for this parameter, since on-site conditions are typically more variable than those in the laboratory, larger measurement uncertainties are expected on-site than what is reported on the accredited scope.
2. Industrial Scales include Bench Scales, Counting Scales, Portable Scales, Floor Scales, Crane/Hanging Scales, Tank and Hopper Scales, and Forklift/Lift Truck Scales.
3. The CMCs for balances and scales are highly dependent on the resolution of the unit under test. The CMCs presented here do not include the resolution of the unit under test. The resolution will be included in the reported uncertainty at the time of calibration.
4. This scope is formatted as part of a single document including Certificate of Accreditation No. L1126-1.
